ABOUT ME

With 2½ years of experience in front-end development, I'm passionate about transforming beautiful UI designs into interactive web applications using Vue.js and Nuxt.js. My goal is always to create smooth, responsive websites that perform flawlessly across devices.

EDUCATION

High School Diploma (In Progress)
I am currently pursuing my high school diploma at SAMPAD High School in Yazd, Iran, and expect to graduate in 2025.

PROJECTS

Forexima 2025
Developed the front-end of Forexima.com, a bilingual Progressive Web App (PWA) for a forex trading firm. Utilized Nuxt.js, Nuxt UI, Pinia, and i18n to create responsive interfaces with multilingual support. Integrated RESTful APIs to manage dynamic data and trading functionalities seamlessly.

WalNext 2024
Built the front-end of Walnext, a Persian-language site with a modern UI, using Nuxt.js, Tailwind CSS, and AOS for animations.

PSD Station 2024
Contributed to PSD Station, building a responsive front-end with Vue.js that let users customize seasonal templates and schedule automated posts.
